

OPENING OF THE **geoVR** EXHIBITION

You are invited to the official Magma UNESCO Geopark opening of the geoVR exhibition!

Tuesday 14th of November 19.00-21.00 in the Magma Geopark office, Elvegaten 23.

Refreshments will be served and everyone will of course get the possibility to try the geoVR.

geoVR is a pioneering and new technology giving you the possibility to visit localities in the Magma Geopark, other geoparks and areas around the world – all at the same time as you learn about the geology, culture and history of the sites.

The geoVR exhibition is financed within several projects and funds:

the geoVR project by NORA (Nordic Atlantic Cooperation), the GEMuseum project by Nordic Culture Fund, geoVR by Rogaland County, the Drifting Apart project financed by the European Interreg Northern Periphery Program and geoVISUAL project by the UNESCO Norwegian Commission.

Welcome!
